Simple operation rotary switch remote head

LTS SYSTEMS introduces the model LTS104 siren system. This economy siren has all the best features of the LTS1000 series, model sirens at an economical price. It features the patented dual channel fail-safe circuit, and the famous LTS sound, including Mix sound in single speaker mode.

The LTS siren sound covers a broader range of frequencies which is easy to hear and recognise. It is operated by a simple single rotary switch that can be mounted near the operator for ease of use.

Installation is simple and quick, It comes complete with all mounting hardware including high quality low loss speaker leads as standard.

Model	Voltage	Current	Speaker
LTS104-12S	12VDC	10 amps	100W(8ohm)
